

Application for Alpine Homologation / Course Approval Inspection

To request alpine course homologation, please complete the Application Form and submit to
U.S. Ski & Snowboard - Alpine Course Approvals

All FIS and U.S. Ski & Snowboard (Nat) alpine races in all events for all age and ability levels must be calendared and conducted on trails which have been homologated by FIS or U.S. Ski & Snowboard or approved and registered by U.S. Ski & Snowboard following inspection and favorable report.

Refer to FIS and U.S. Ski & Snowboard rules, section 650, for specific requirements and schedule of implementation. For FIS, these rules can be found at: fis-ski.com/en/inside-fis/document-library/alpine-documents and for U.S. Ski & Snowboard at: my.ussa.org/ussa/alpine-course-homologation-rules.

The homologation, or course approval, process consists of:

Responsibility	Action
Venue	Application (completion of the form and submit with fee)
Venue	Documentation (collection of information and development of documentation for the report, see links above)
Inspector w/ Venue	On site visit by assigned inspector. Compilation of report.
Courses Chair	Approval of the report.
U.S. Ski & Snowboard	Issue of a certificate and maintenance of documentation in file.
U.S. Ski & Snowboard	Inclusion in information updates (lists); publication on FIS and/or U.S. Ski & Snowboard site.

The application form completed by the place (ski club, ski area, race organizing committee, etc.) provides the U.S. Ski & Snowboard Alpine Courses Working Group Chair and the assigned inspector with essential information about the venue (place), including who will be responsible for inspection arrangements, for preparation of documentation, and for payment of fees and expenses.

The application includes information needed for assignment of an inspector, based on the potential and proposed usage of the course, and compels the venue (place) to check key technical data in the context of the rules prior to requesting inspection. It is important to confirm vertical drop – elevation difference from start to finish - and minimum width(s) in advance.

Application fees corresponding to the proposed homologations are to be submitted with the application. These payments will be applied to the actual homologation fees determined following inspection. Fees for any additional homologations requested during the inspection will be due prior to approval; application fees may be refunded if proposed courses are withdrawn prior to inspection.

On receipt of the application form and fee, the U.S. Ski & Snowboard Alpine Courses Working Group Chair will assign a qualified inspector. Once assigned, the inspector will collaborate with the venue (place) regarding scheduling and other arrangements for the inspection and in preparation of the documentation required for the final report package.

According to the rules, in addition to the application fees, in all cases the inspector's expenses are the responsibility of the venue (place) and must be reimbursed on request of the inspector, regardless of the outcome of inspections.

Oct. 2022

Submission of the application requesting assignment of an inspector is deemed as understanding of/and agreement to this responsibility of the venue. Reports will not be certified until inspector fees are paid.

One application form is to be submitted per course and event - exception: U.S. Ski & Snowboard GS and SL on the same slope/trail should be submitted together on a single form.

Completed applications may be sent as email attachments to competitionservices@ussa.org or by mail (Course Approvals | c/o Competition Services | PO Box 100 | Park City, UT 84060). Payment for application fees can be included with application, followed up by mail, or paid over telephone. Checks for application fees should be payable to "U.S. Ski & Snowboard Alpine Course Approvals".

Requests for homologation which are received prior to the annual May U.S. Ski & Snowboard Congress meetings will have priority for assignment of an inspector. Applications should be submitted by Dec. 31 of the year prior to expiration. A \$25 late fee will apply starting Jan. 1st. A \$50 late fee will apply Aug. 15 for FIS /Sept. 15 for U.S. Ski & Snowboard. Inspections should be done and reports with documentation submitted by Sept. 30 for FIS /Oct. 31 for U.S. Ski & Snowboard.

FIS requires, and it is preferred for U.S. Ski & Snowboard, that new inspections be done in the off-season. Rehomologation inspections for can be done on snow.

Additional information on deadlines, fees, including late fees, and related will be found at: usskiandsnowboard.org/sport-development/officials-development/alpine-homologation

On receipt of the application with fees, the chairman will review the application, address any concerns with the venue (place), assign an appropriate inspector and forward copy of the application to that inspector.

The assigned inspector will communicate directly with the contact person noted on the application, make arrangements for the inspection and to consult and collaborate in development of the documentation to accompany the inspector's report.

Additional information about collection of data, development of documentation and arrangements for the on- hill inspection will be found at my.ussa.org/aip/alpine/alpine-course-homologation-report-packet.

FIS and U.S. Ski & Snowboard course inspectors can provide further information and guidance about homologation requirements, rules and process. A list of inspectors can be found at usskiandsnowboard.org/sport-development/officials-development/alpine-homologation

Application Form

Request for Alpine Homologation / Course Approval Inspection

Application Date: _____

Place: _____

(location of the course proposed for homologation, including ski area name, city/town, state)

Contact person: _____

(person who will be responsible for inspection arrangements, documentation, fees and expenses)

Relationship to area/club/ROC: _____

Address: _____

City: _____ State: _____ Zip Code: _____

Phone: _____ Email: _____

Name of trail(s)/course(s): _____

(provide information separately for each trail/course, using additional forms)

Proposed for (please indicate):

New homologation or Rehomologation (certificate # _____)

FIS (includes U.S. Ski & Snowboard) or U.S. Ski & Snowboard

Events: DH SG GS SL

Technical data:

Elevation of highest proposed start (meters): _____

Elevation of lowest proposed finish (meters): _____

Has the width of this course been measured, especially at narrower places? Yes No

Are there any places with less than 40 meters width? Yes No

Are there any places with less than 30 meters width? Yes No

Application fees to be submitted with this application:

- FIS - \$ 250.00 per event (includes U.S. Ski & Snowboard homologation for same event)
- U.S. Ski & Snowboard \$ 150.00 per event - (\$150.00 for Nat GS/SL on same trail, same report)
- Late fee: FIS & U.S. Ski & Snowboard after Jan. 1 of current season, additional \$25.00 per course
- FIS after Aug. 15, U.S. Ski & Snowboard after Sept. 15, additional \$25.00 per course (maximum late fee of \$50 per course)
